Subject: RE: Confidential - Residential VI Letters [Ex. 6 Personal Privacy (PP)]

Hi –

Good letter.

Remember I mentioned that Conor found a typo but then I couldn't find it again?

I think that "and" belongs after "fibers."

Will set up a conference call for mid-week.

Carolyn

The constituent 1,2-DCA is commonly present in indoor residential air samples as the chemical is utilized in the manufacturing of various plastic, rubber and synthetic textile fibers retail goods.

Subject: Confidential - Residential VI Letters [Ex. 6 Personal Privacy (PP)]

Carolyn

Good afternoon. I have been asked by the property owners for [Ex. 6 Personal Privacy (PP)] to expedite letters confirming the results since both structures are rental units. Attached are copies of the letters for your records. They are being delivered to the property owners via email today and hard copies of the letters are also being mailed to them. We anticipate sending out additional letters next week.

The letters should be redacted prior to release to the public (if requested) since I had to include the address of the structure on the letter since the tenants do not have the site identification rubric. Please contact us with questions or if you need anything else.

Sincerely,

Bradley E. Gentry, LPG
